AC890 and AC890PX from SSD Drives—2 New Options Enhance Drive Capabilities For Demanding Motion Control Tasks

Adding to our existing stable of option cards, Parker SSD Drives is pleased to announce the immediate availability of the **8903/EP/00** and **8903/AI/00** options. The new option boards, offering high-resolution analog or encoder input, increase the flexibility and capability of the AC890 and AC890PX drive families. Possible applications include electronic line shaft applications, machine tools, and other demanding motion control tasks.

AC890 Stand Alone & Common Bus Drives

0.75—1500 HP / 0.55—1200 kW
230 / 460 VAC

Flexibility

- V/Hz
- Sensorless Vector
- Flux Vector
- Brushless AC
- Brushless DC
- AC Induction Servo

AC890PX

High Power Modular AC Drives
150 – 600 HP / 110 – 400 kW
380—690 VAC
